

KING KOP4800 ONE PRO PREMIUM SATELLITE ANTENNA

~~\$599.00~~ \$429.00

SKU: KOP4800

FEATURES

One antenna, all providers: Enjoy the KING One Pro™ advantage. With the introduction of next level satellite antenna technology, the KING One Pro fully automated premium satellite TV antenna gives you the freedom to take your favorite TV programming – on DIRECTV®, DISH® or Bell™ (Canada) satellites – with you on the road, to the great outdoors, or anywhere you go. It's the only antenna on the market that *automatically* configures for U.S. satellite service without the use of DIP switches – taking all the guesswork out of getting started. Ideal for RVers, sporting and outdoor enthusiasts, tailgaters, long haul truckers or anyone with an active mobile lifestyle. The KING One Pro is highly portable, easy-to-use, and includes our ultramodern clear cover – Always know where your antenna is pointing. It's simply better, by design. (Requires compatible receiver and does not provide service while moving.)

MODERN DESIGN AND PREMIUM FEATURES

At KING, we're always looking for ways to better serve our customers. With the KING One Pro, we are introducing an enhanced industrial design and our ultramodern, clear cover – Always know where your antenna is pointing. You'll love the sleek new look and enjoy the maximized signal strength that comes with this design. Trees blocking your line of sight to the satellite? One Pro lets you know. The clear cover allows you to see exactly where your dish is pointing to simplify troubleshooting and ensure you're

receiving the best signal. KING One Pro's electronics and software means the fully automatic setup is faster and simpler than ever before. KING One pro supports multiple TV viewing*, so you can stay current on more than one show or live event. The One Pro allows you to take your DIRECTV®, DISH® or Bell™ satellite TV service with you wherever you go, so don't leave the world behind on your next adventure.

PORTABLE AND LIGHTWEIGHT

The KING One Pro uses next level satellite antenna technology to bring you crystal clear, live TV in just minutes. Weighing only eight pounds, the KING One Pro is compact and the built-in carrying handle makes it easy to transport. For a more permanent setup, you also have the option of easily mounting the antenna to the roof of your RV with the integrated mounting feet (no additional mounting brackets required). It's never been easier to stay connected and get digital satellite TV service anywhere you go.

WHO IS IT FOR? WHAT DOES IT DO?

The KING One Pro is a fully automatic premium portable or roof-mountable satellite TV antenna for DIRECTV®, DISH® or Bell™ programming. Ideal for RVers, sporting and outdoor enthusiasts, tailgaters, long haul truckers or anyone with an active mobile lifestyle, the KING One Pro is highly portable and easy-to-use. Those looking for a more permanent setup can easily mount the antenna to the roof of their RV. Portable and compact (weighing in at only 8 lbs.), KING One Pro offers a fast, easy and reliable connection to your favorite channels.

You'll never have to miss the big game, breaking news reports, or your favorite show while out and about. Like all of KING's mobile satellite TV antennas, the KING One Pro is great for camping, RVing, hunting, fishing, or at your backyard barbeque, second home, cabin, or ice fishing house.

HOW IT WORKS:

The KING One Pro automatically configures itself when connected to a compatible receiver using the provided coax cable and in-line power inserter. Within minutes of powering, the KING One Pro premium satellite TV antenna will automatically locate the satellite signal and you will be able to watch crystal clear TV. The KING One Pro is powered over the coax using a small in-line power inserter. You will need a power inverter, portable generator, power pack, or other 110-volt AC power source for the receiver, power inserter and TV.
